I'm a software engineer with over 2 years of experience as a front end developer. I have a natural eye for design and UX, and the bulk of my experience has been spent developing in React with TypeScript, using MUI and styled-components, including the transition of a legacy app to a SSR app using Next.js. In my previous profession I was a chef/cook, and I learned a lot about teamwork, adjusting on the fly, and paying attention to the details.
